

# H&M, VivoCity – Singapore

## Chain Retailer Supplying On-Trend Clothing

### Project Name:

H&M, VivoCity Mall, Singapore

### Installer/ Applicator:

Coating & Lining Technologies Ptd Ltd, Singapore

### General Contractor:

Kingsmen Projects Pte Ltd, Singapore

### Owner / Architects:

H&M Singapore Head Office

### Featured Products:

- PANDOMO K2
- ARDEX A 45 Rapid Hardeninf & Drying
- Repair Mortar
- ARDEX R2SE General Purpose Solvent Free Epoxy Primer
- ARDEX Stone Oil

### Challenges:

- Multiple trades working simultaneously
- Noise regulation, night work
- Wet areas
- 1200m2 project in just three days

### Situations:

The client wanted a beautiful PANDOMO® Loft floor. The substrate was old cement sand screed with numerous cracks and loose patch. The environment presented strict prohibitions against dust and noise. The temperature in the mall is around 21 to 23 degrees celsius when open, but up to 30 degrees after hours.

### Solutions:

A combination of ARDEX products, customer service, technical services and support enabled this job to be successfully completed from start to finish. Coating & Lining Technologies is experienced in the retail environments and was able to work around other trades, even on the crowded midnight schedules. Communication between all the parties was outstanding. The finished, colour-matched PANDOMO Loft floor was delivered on time and in perfect condition.
