Solution

The TINIWORLD children's playground stores located nation-wide in Vietnam have been equipped with top-quality materials specified by an experienced interior designer. The finishing floor, a vinyl material, is 2mm thick and guarantees both durability and quality. However, that's not where it ends. The team goes a step further by ensuring a flat substrate using the ARDEX K 310 leveling compound system. The ARDEX K 310 system is designed to dry quickly, enabling our applicators to efficiently meet the fast-track project requirements of every TINIWORLD store. With the green label and user-friendly properties of ARDEX K 310, the owner and interior contractor can rest easy knowing that we're doing our part for the environment while delivering a top-quality finish.
